

Astraline is a leading specialist provider of customer-led, flexible safety services designed to support independent living.

Astraline Personal provides products and telecare services to help you or your family retain independence, continue living at home, and give peace of mind to loved ones that if it is needed, help is close by.

As a Johnnie Johnson home owner and customer you can access the 24/7 service that Astraline provides for an additional monthly fee at any time. It may not be something you need to consider right now, but at least you know it's there should your needs change.

We have a number of products available for either rent or purchase and the range covers devices that can be used both in and outside of the home. Product prices do vary and for any purchases or rents, there is a one off setup fee of £45+VAT. It's worth noting that you may be eligible for VAT relief, if you have a disability or long term medical condition.

Find out more about the benefits and products that may be best suited to your needs by visiting www.astraline.co.uk. You can also follow us Facebook and Twitter to get up-to-date offers and news.
